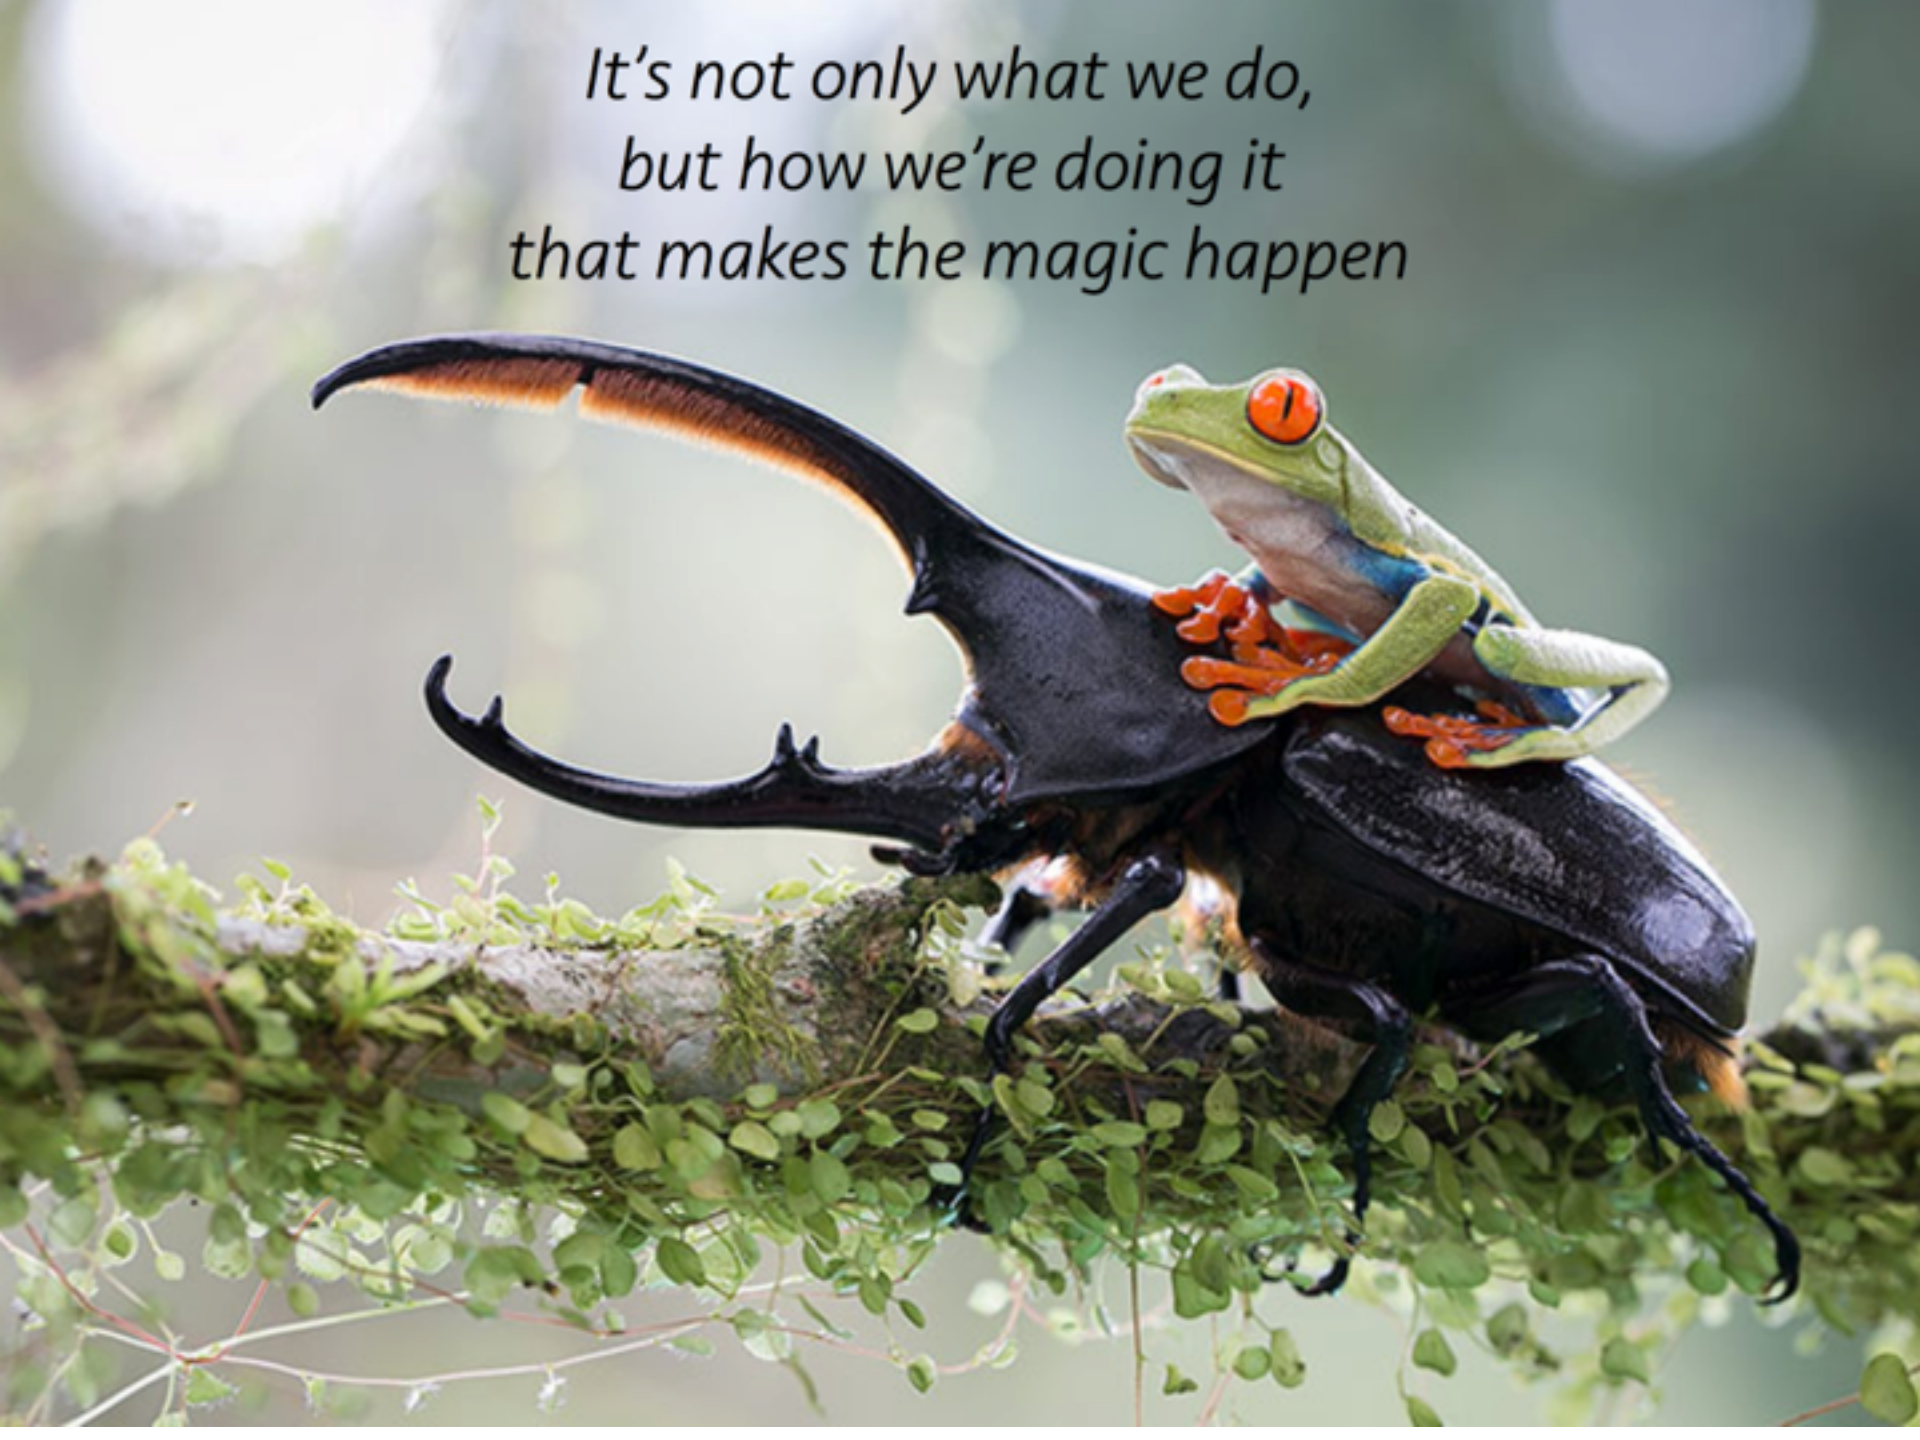
Paving the internet of roads

---------- over a ----------

Decentralized

Ride-Sharing App

It's not only what we do,
but how we're doing it
that makes the magic happen



Transportation is a basic part of our life
Traffic jams are not inevitable
Instead,
We see traffic as
Abundance
Of empty seats
Waiting to be harvested
TAXI-METER

Real-Time Ride-Sharing

is simply a matter of synchronization

The challenge is:

creating a critical-mass of users

Crypto

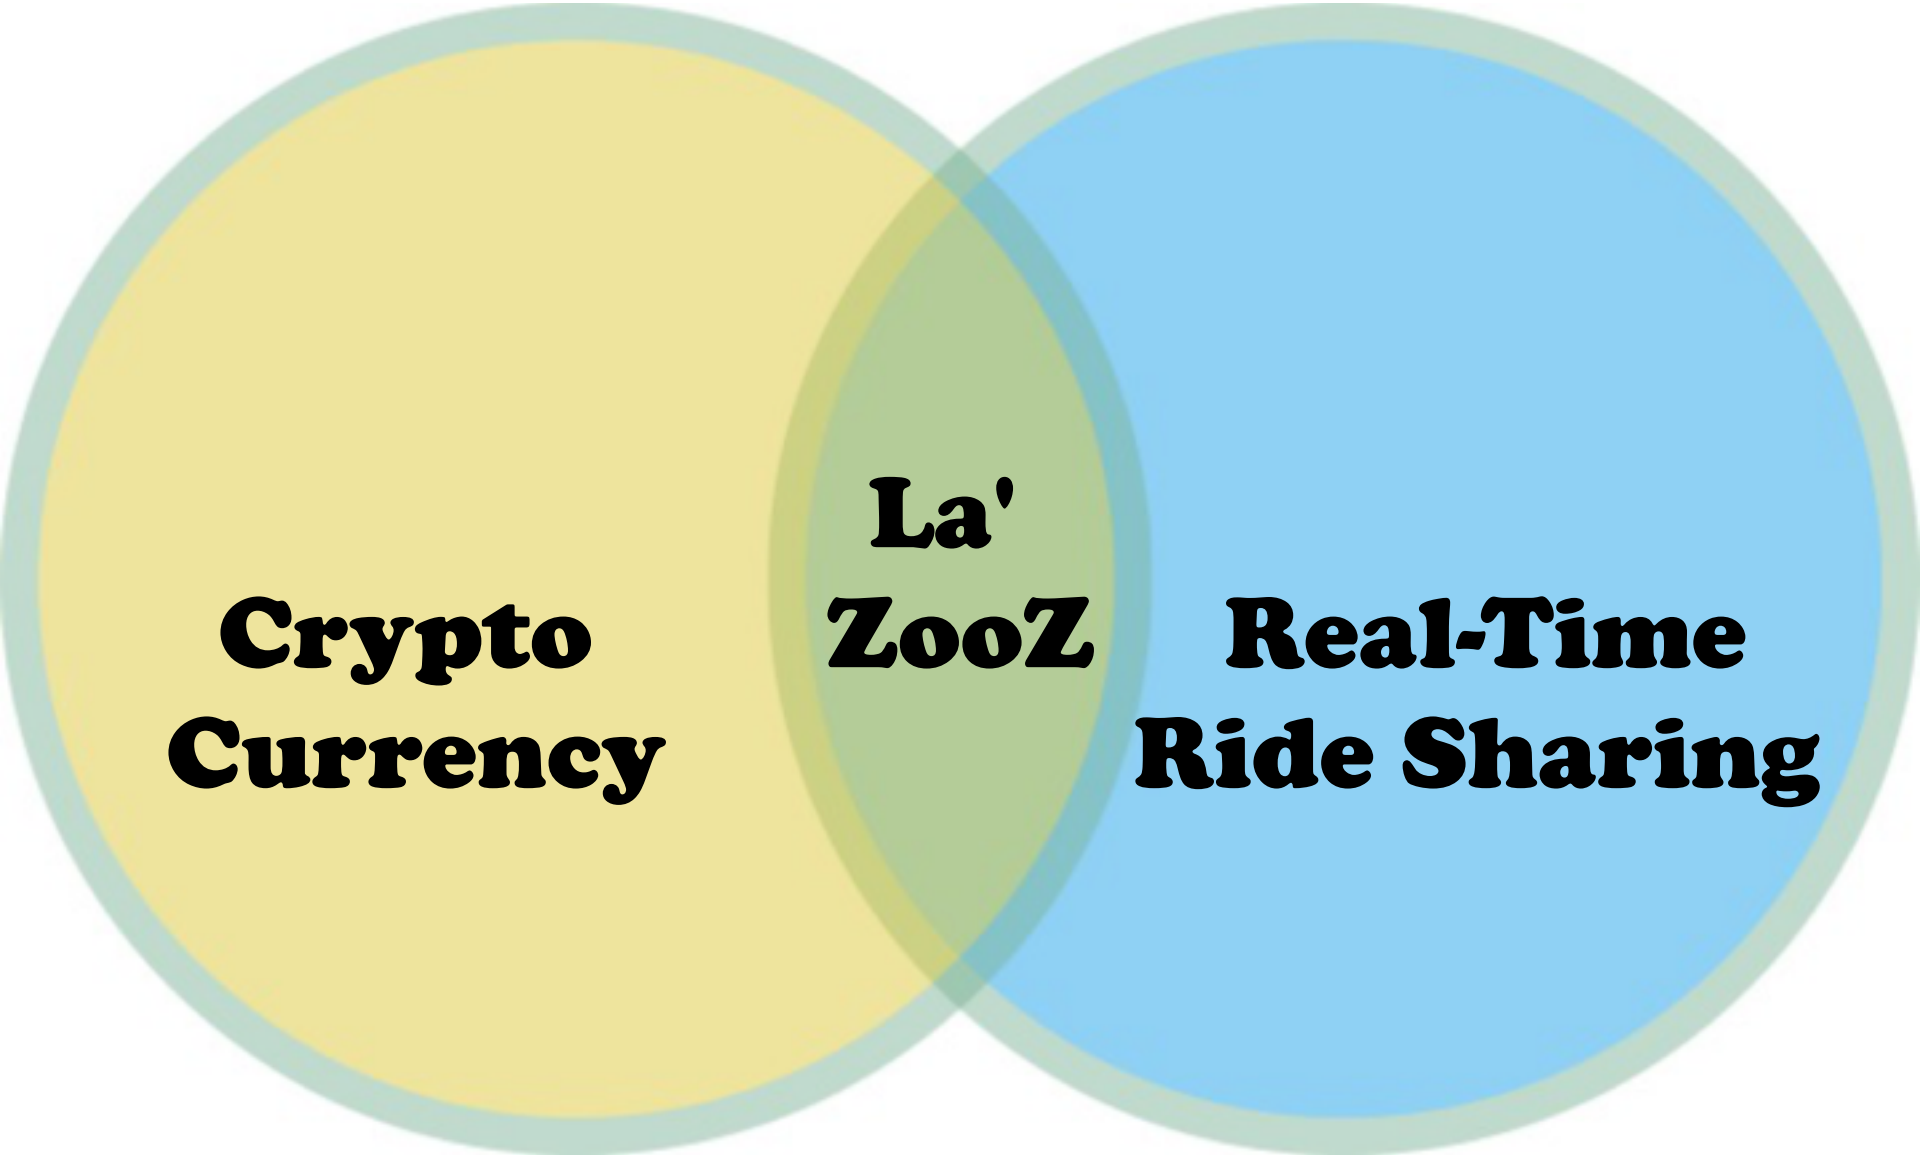
Real-Time
Ride Sharing



Crypto Currency
La' ZooZ
Real-Time Ride Sharing

Strategy

- **Phase 1** — Creating the critical mass of users, releasing an app that only **sends GPS location** and **mine the Zooz coins with the MasterCoin protocol**.

- **Phase 2** — Upon the (local) establish of **critical mass**, opening the ride-sharing option for users to start **sharing rides**.

- **Phase 3** — Building the "**internent of transportation**", an **open-source platform** with open APIs for all third-party transportation apps to communicate with each other.
La' Zooz is the communication platform and language.
